29th June 2012: FOR IMMEDIATE RELEASE

ESCCAP announces the publication of the second edition of Guideline 3 “Control of Ectoparasites in Dogs and Cats”.

This guideline combines the two previous Ectoparasites Guidelines Part 1 and Part 2 and provides comprehensive and independent advice on the diagnosis, control and treatment of ectoparasites in dogs and cats in one Guideline.

Key species are covered and there is also the most up to date advice on the control and management of major ectoparasites in companion animals. To download a free copy of this new edition of the guideline, visit www.esccap.org.

It is the aim of European Scientific Counsel for Companion Animal Parasites (ESCCAP), to provide veterinary and medical professionals with expert and independent information and advice on parasites and parasitic diseases in companion animals. ESCCAP comprises 13 Directors and Members who are all leading parasitologists from across Europe. Their ESCCAP guidelines seek to raise awareness and provide essential advice on the most appropriate measures to protect humans and companion animals.

Ends

Note to Editors:

The ESCCAP group creates independent guidelines for the optimal control and treatment of internal and external parasites that threaten the health of companion animals. The long term goal for ESCCAP is that parasites shall no longer be a health issue for pets or humans throughout Europe.

ESCCAP is a not-for-profit organisation currently represented by 13 leading parasitologists and veterinary experts in: Austria, Benelux countries, Denmark, France, Germany, Italy, Portugal, Poland, Spain, Switzerland, and UK.

ESCCAP is kindly sponsored by Bayer Animal Health, Novartis Animal Health, Merial Animal Health, Merck Animal Health, Pfizer Animal Health and Elanco Animal Health.
